❶ Label reasoning
Solve $x^2 - 5x + 6 = 0$.
Analyze
Roots: sum 5, product 6.
Implement
Factor: $(x-2)(x-3) = 0$.
Verify
Test $x = 2$: $4 - 10 + 6 = 0$.
❷ Read routing
Routing probabilities p_e, one layer
Top-2
0.5
0
